

a Fixed coordinate system

residual read as noise

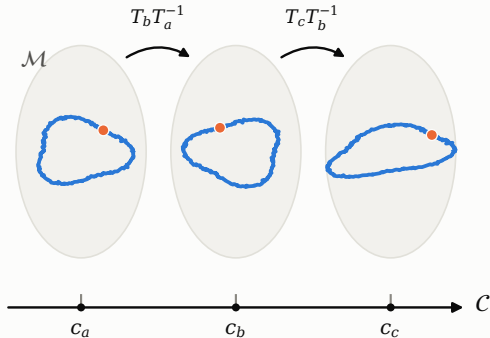

● ctx a ● ctx b ● ctx c

one manifold fitted to pooled activity

b

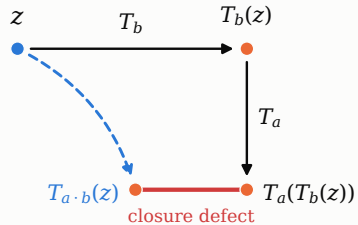

Gauge neural dynamics

context space
one latent state, three coordinate frames

c

Approximate group structure

$$T_{a \cdot b} = \exp \text{BCH}(\theta_a, \theta_b),$$
$$[G_i, G_j] = \sum_k f_{ij}^k G_k + R_{ij}$$
